## Personal Statement

*I am a hardworking and driven individual; I always go the extra mile to ensure any task I complete is done at the best possible standard. So far in my career, I have consistently been a high performer while also managing to create a harmonious work-life balance that keeps me motivated and personally rewarded. Since May 2019 I've been learning JavaScript, HTML and CSS and also dug deeper into frameworks such as React and Angular. I also scratched the surface of server-side languages with NodeJS and enjoyed creating some aps and APIs.*

## IT EXPERIENCE
